

DAMOCLES WEBINARS

UNDERSTANDING AND MODELING COMPOUND CLIMATE AND WEATHER EVENTS

European COST Action CA17109

<http://damocles.compoundevents.org/>

Webinar 1 - DAMOCLES:

Dissemination of identification of DAMOCLES Stakeholder Network

Organised by Working Group 2 - Stakeholder involvement and science - user interface

Presented by Dimitra Theochari, WG2 Co-Leader, Architect and Landscape Architect

DAMOCLES WEBINARS

Webinar 1 - DAMOCLES: **Dissemination of identification of DAMOCLES Stakeholder Network**

Abstract:

DAMOCLES COST Action on Compound Weather Events aims to establish and coordinate a network of previously unconnected communities including climate scientists, hydrologists, impact modelers, risk modelers, statisticians and stakeholders. WG 2 connects the scientific network developed through the Action with a network of stakeholders for whom Compound Events are important in decision-making. One of the first activities is to identify the stakeholder network already present in the action and to supplement this to match the action's scientific modeling expertise. In this presentation the identified stakeholder network of the DAMOCLES will be presented with the aim to continue the discussion of the Prague and Berlin meetings on how to foster collaboration within our COST Action.

Organizer: WG2 DAMOCLES

Presenter: Dimitra Theohari, WG2 Co-Leader

When: 07.11.2019 13:00 CET (Central European Time) UTC/GMT +1 hour

Duration: 15 min Presentation, 10 min Q&A
